Hi Don,

Just a little note to let you know the added bonus we are enjoying as a result of the siding, insulation and new windows you installed in our home last year. We received our summary of oil usage for the year and the number of gallons used was 201 less than the previous year. I actually contacted the oil company to verify as I was so stunned. We had noticed that the house warmed up quicker and stayed warmer but did not realize the savings we were deriving from the installation of the new products.

We wanted to share this with you in addition to thanking you and your crew again for the outstanding job you did. We could not have asked for a more professional, courteous and dedicated crew. You were true to your word, and we did not find a single nail in the yard putting my fears of an injured child to rest. As you know, choosing a contractor was not a decision we took lightly and fortunately for us, we made the right one.

Thanks again.

Theresa & Scott Wojtkiewicz
